

Photo Montage II

By Mark Langfan

1. West Bank Mountains Depicted by L-shaped Black Piece

Description: Black Plexiglass Piece echoes topography of West Bank, steep Western Section running east from the Jordan River and shallow Eastern Section running East from Crest line to green line 1967 “border”.

Cross-section of Terrain between Tel Aviv and Amman*

Figure 4

Page 13 - "The Importance of the 'West Bank' and Gaza to Israel's Security", 1985

Map 7: Topography and Israeli Security: Utilizing the 4,200-Foot Mountain Barrier to Protect Israel's Vulnerable Coastal Plain

2. Katyusha Rocket (Piece) Fire from Gaza compared with Katyusha Rocket Fire from the West Bank into Tel Aviv

Description: Now the Gaza terrorists fire Katyushas into mostly relatively empty farm fields around Gaza, if they get the West Bank they will hit Tel Aviv.

A. Now Palestinian terrorists fire Katyusha and Kassam rockets into relatively empty acres in and around Gaza. It's like firing a Katyusha in a North Pakistan empty field.

B. But if the Palestinian got the West Bank, they will be firing Katyushas in the Tel Aviv Netanya corridor. This is like firing rockets from Brooklyn into Manhattan. There will be horrific bloodshed and death.

3. 200K Jewish Civilians Held Hostage by Ice Cream Cone Orange Piece

Description: 200,000 “Coastal Plain rectangle” Jewish civilian hostages/prisoners of war is “game over”.

C. 5 million Jews in 10 mile (east-west) by 40 mile (north-south) coastal plain rectangle (including population from Jerusalem which is included because it is even more at risk given the topography).

- D. If an attacking Arab army, with only “9 Narrow miles” from the Green Line to the Mediterranean Sea will “Cut Israel in two”, Cutting “Israel in Two” is a cliché.
- E. The left response is “That’s how wars start.” “What’s the big deal, Israel can always attack back!”
- F. Because of the 5 million Jew density in the Coastal rectangle, Any Arab or Muslim army that successfully reaches the Med from the Green Line, hasn’t just “Cut Israel in Two” but has taken at least 200,000 Jewish civilians hostages and prisoners.

- G. With 200,000 Jewish civilians as hostages/prisoners, it’s not “game on,” but “game over”!! Israel will have to capitulate to surrender terms. It’s checkmate, before the war has even started.
- H. If a chemical Katyusha attack north and south rectangle of 4-5 million Jews in the blue rectangle will be “bottled up” inside the blue rectangle and unable to mobilize.

4. **Tel Aviv Iron Domes Will Be Overwhelmed by multi-vectored Katyusha Rocket Pieces**

Description: Tel Aviv Iron Dome missile defense units will be overwhelmed by multi-vector multi source West Bank Katyusha rocket barrage attacks.

A. Iron Dome has a very narrow angle of rocket Interception- Basically what's directly in front of it.

B. Now, when the katyusha rockets from Gaza are fired they can only be fired from one very narrow vector which is virtually only directly from the south. So Iron Dome is able to focus on that one vector and still misses and large amount of rockets especially when they are fired simultaneously (all at once) in series from one multi-rocket truck. Even then, Iron Dome only intercepts 75% at best.

C. But when the Palestinians will fire rockets from the West Bank, the Palestinians will be able to fire from many completely different vectors and many trajectories and will overwhelm Iron Dome's narrow interception window.

5. **West Bank Katyushas in Tel Aviv will be modern day *Dien Bien Phu*.**

Description: By L-shaped and Katyusha Rocket Pieces.

- A. The Western Samarian mountains (L-shaped piece), from the sea level Tel Aviv coastal plain of the Green Line to the Jordan Rift valley Crest, rise to about 3400 ft in about 20 miles. Now those mountains ridges are under Israeli full military control and Palestinian terrorists can not smuggle Katyusha rockets into this militarily sensitive zone totally controlled by Israel.

- B. But if those Samarian and Judea mountains overlooking the Israeli Tel Aviv coastal plain are under Palestinian Military control nothing could stop Katyusha rocket smuggling by Hamas or extreme Fatah. These terrorists will be perfect vantage points from which to fire Katyusha rockets down into the sea level Tel Aviv 40 mile x 10 mile coastal plain holding 5 million Jews.

C. Israel will have to mobilize under fire, and then fight uphill against the heavily fortified Palestinian defensive positions. ??

6. The actual Palestinian “Demographic” threat actually boomerangs against an Israel withdrawal from the West Bank.

Description:

A. The 200% likelihood of a West Bank Katyusha rocket attack into the Tel Aviv Coastal plain rectangle makes an Israeli “reinvansion” scenario inextricably linked and comparable to the

status quo West Bank Palestinian “Demographic” threat. Show Katyusha Rocket attack in the blue rectangle.

- B. Because of the extremely high probability to absolute certainty of the Katyusha Rocket into Tel Aviv “reinvansion” scenario, the number of Palestinians in the West Bank under a *status quo* scenario

must be compared to the number of Palestinians that will be in the West Bank in 3 years under a Palestinian West Bank State Scenario. Where the Palestinians have the right to bring in any amount of Palestinian immigrants/terrorists into the West Bank just like they did in Gaza.

- C. As a function of time T where T is the X axis and the number of Palestinians in the West Bank is the Y axis, under the *status quo* Palestinian Demographic scenario, at worst, there is a moderate increase in Palestinian West Bank population growth as depicted by the straight upward slope.

- D. However, under a West Bank Palestinian State scenario, as happened in Gaza, not only is there the *status quo* Palestinian population growth, but there is the dramatic increase in Hamas, and Iranian terrorists that will emigrate into the West Bank above the *status quo* standing Palestinian population. These additional terrorists are not only heavily armed, but also will bring their families that they will inculcate to hate Israel. So there will be a dramatic increase of the West Bank Palestinian population above the *status quo* baseline Palestinian population numbers.

- E. So in time Year 3 after the creation of a Palestinian West Bank Palestinian State, when there is a Hamas Katyusha rocket barrage attack into Tel Aviv from the West Bank, and Israel has to invade the West (if it even can), not only will there be the *status quo* baseline Palestinian

population, but there is the increased Palestinian population which consists mostly of armed hardened terrorists along with their Israel hating families.

7. **F-16 “Turning Radius” depicted by L-shaped Black piece and two Katyusha Rocket pieces with Paper Binder Clip**

Description: Without the West Bank airspace, due to the large turning radius of modern fighter jets, Jerusalem Airspace will be unreachable for Israeli jet fighters

A. Currently, with the West Bank airspace, Israeli fighter jets with a large turning radius are able to fly over Jerusalem.

B. Without the West Bank airspace, Israeli fighters with even the smallest turning radius will not be able to fly over Jerusalem without breaching the Palestinian West Bank State's airspace.

8. **Jerusalem Access Cutoff with 2 Katyusha pieces and Ice Cream cone piece**

Description: Jerusalem mountain access cutoff from pincer attacks with Kornet-E anti-tank missiles from both sides of the West Bank

- A. With full Israel military control over the West Bank mountain surrounding and overlooking the only supply line to Jerusalem which is at the crest of the Jordan Rift crest, there is full accessibility from Tel Aviv to Jerusalem and from pre-1967 Israel to Jerusalem, the capital of Israel.

- B. But with the West Bank mountains overlooking the Tel Aviv Jerusalem's only supply road, Palestinians with Kornet-E antitank missiles like the one which was fired and murdered Daniel Viflic from the Gaza Strip (having a range of 5 kilometers) ranged the full length of the mountain pass up to Jerusalem could easily lay siege to Jerusalem requiring a full reinvasion of the entire swatch of areas surrounding the Tel Aviv Jerusalem mountain pass road. If Hamas terrorists murdered a 16 year old Jewish school boy in a yellow school bus from the Gaza Strip what would they do to Israeli convoys trying to break through to a besieged Jerusalem!?!

9. **A West ank Retreat only creates an Additive short-range Katyusha threat to Tel Aviv with Katyusha and Ice Cream cone piece**

Description: In the “Age of Missiles” the territory of the West Bank is even more vital for the Tel Aviv coastal plain 70% Jewish population rectangle, than before 1967.

- A. Under the *status quo* missile threat, Israel is threatened with long-range missiles from Egypt, Iran and Syria where there exists a Mutually Assured Destruction (MAD) threat if the Arab/Muslim countries ever fire their long range missiles. The Israel Arab map deterrent has held for 60 years excluding Saddam Hussein’s desperate SCUD attacks in the Gulf Wars. The firing of long range missiles which are undeniably under full government control is an absolute **act of total war** enabling Israel to annihilate the country from which such a long range missiles is fired.

And, Israel is currently also under Katyusha rockets short-range “terrorist” rockets from Gaza. This short-range Katyusha threat is mostly ineffective in that all the land around Gaza is empty immediately around Gaza. So there are now two simple non-existent threats, a long-range SCUD total attack to Tel Aviv and a short-range from Gaza into the generally empty space and Gaza.

- B. Under any cognizable “peace” plan, none of the Arab/Muslim countries which now possess long range missiles will “scrap” their long-range missiles even if Israel retreats to the pure 1967 cease-fire lines **including Jerusalem and a return of all the 7 million claimed Palestinian refugees to Tel Aviv and Haifa**. Therefore, the only change in the long-range “missile threat” is that in addition to the long range “state” missiles, now Tel Aviv Coastal Plain rectangle will also have ranged against it the short range “terrorist” totally deniable Katyusha rocket threat from the West Bank.

- C. So when a “deniable” Hamas “terrorist” from the West Bank “deniably” fires a ball-bearing war-headed Katyusha into Tel Aviv murdering dozens of Jews and the West Bank Palestinian President ‘denies” responsibility, and Israel “mobilizes” to reinvade, this will give all the Arab-Muslim countries with the long range missiles the perfect legal context to simultaneously fire their long range missiles into the Tel Aviv rectangle in defense of the West Bank Palestinian State.
